

EVERGLADES STUDENT AMBASSADOR PLEDGE

Be an Everglades Student Ambassador and take the pledge to protect the Everglades, all of the life that lives in it, and the water that flows through it! Everglades conservation is something that can be done at home, school, and with the community.

The Everglades is a special, unique ecosystem home to thousands of plant and animal species, while providing the drinking water supply for nearly 9 million Floridians. The Everglades is a treasure that belongs to all Americans and to the world.

I/we understand that learning about the Everglades will help to make better informed decisions, reduce negative environmental impacts, and protect this unique ecosystem.

In order to do my/our part, there are many actions I/we can take to save the Everglades. With help from my teachers, family, and friends, I/we pledge to:

- o Learn about the Everglades and educate others
- o Make daily efforts to conserve water through my actions
- o Make a positive environmental impact through informed decisions
- o Explore the Everglades through outdoor and virtual experiences
- o Other ideas: _____

By signing below, I/we pledge to be an Everglades Student Ambassador.

Share this pledge with others to display your commitment to being an Everglades Student Ambassador!
